## POND ZINGER

### Turn Your Dirty Pond Clean

Dirty water decreases the amount of oxygen in the water causing stress to fish and other aquatic life.

Pond Zingers work like a magnet, binding together suspended inanimate particles thereby cleaning the dirty water.

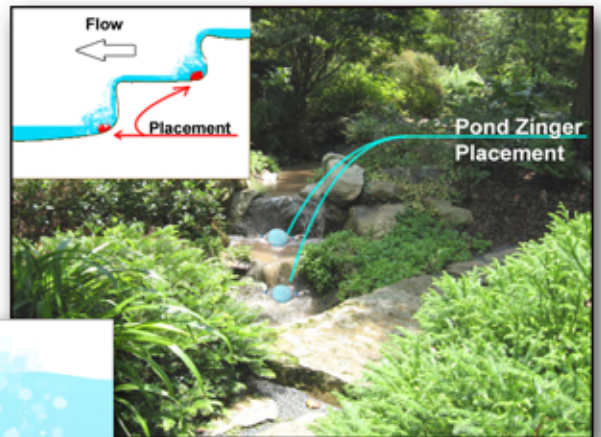

Pond Zingers are used in small ponds, such as backyard ponds, garden ponds, etc.

Pond Zingers are packaged 24 or 48 per box

2160 Pond Zingers per skid (45 boxes of 48)

Product	Dimensions	Wt.	Volume Treated	SKU
Pond Zinger	3" diameter	~0.25 lbs	500-12,000 gallons	7-93573-04909-4

Pond Zingers can be installed above an aerator, under a floating fountain on the steps of a waterfall or with any circulation mechanism. The water must be moving over and around the Pond Zinger for it to work.

All Pond Zingers are safe for fish; no need to monitor pH.

The Pond Zinger is a semi-solid block of environmentally safe, non-toxic anionic polymer formulation to clean dirty water and reduce aquatic life toxicity.
